John,

It was good talking with you last week and I hope your trip home went well.

During our discussion related to contaminant uptake from particulates adhering to carp gills, you mentioned a paper that described a contaminated sediment site in Argentina. The Ondarza et al. 2010 paper, which is described in your, "\$summary of carp papers", was not included in the files I copied from your USB drive. I downloaded an Ondarza et al. 2010 paper (attached), and I just want to confirm that it is the same one you referenced.
